Custom colour matching available on request to any manufacturer's samples.

*Due to limitations in colour reproduction and print process, colour swatches may vary from the actual product.

The Perfect Match for Your Project

ColorTrete is a mineral-based masonry stain and colouring system that has been used worldwide for several decades. Unlike acrylic or latex paints, mineral paints do not form a film on the surface. Instead, they soak into the material and chemically bond with it, becoming a part of the surface itself. This characteristic allows ColorTrete to be breathable, preventing issues such as cracking or peeling over time. In fact, ColorTrete can last for 25 years or more, making it a durable and long-lasting solution for architectural finishes.

ColorTrete is particularly effective for creating a concrete look, and it offers various application techniques to add depth to the coating. Additionally, the company specializes in custom colour matching, which can help resolve any blending, patching, or repair problems you may encounter. Safetec Solutions has partnered with a reputable mineral paint supplier with over 20 years of experience in the mineral paint sector, ensuring a wealth of knowledge and expertise.

Our Products

ColorTrete SiLasur #1020

SiLasur is a semi-transparent silicate stain that depending on the level of dilution can be used to create a more natural stained look. SiLasur is designed as a carrier for strong colouration from opaque to transparent finishings. It can be used for colour washes, glazings and faux painting effects.

ColorTrete Quartzguard #1010

Quartzgaurd is a vapour permeable and water repellent paint designed to provide the same type of coverage as a traditional latex paint. Quartzgaurd has excellent hiding capabilities with a matt finish. Quartzgaurd is a superior product for exterior painting of any masonry including brick, stone, stucco, concrete and plaster.

NO HAZARDOUS WASTE
Once dry, our products solidify and turn to solid stone for easy and safe disposal.

ENVIRONMENTALLY SOUND
All natural and inorganic ingredients, reducing overall raw material usage.

VAPOUR PERMEABLE
Completely breathable. No moisture is trapped in the substrate.

WATER REPELLENT
Resists water penetration.

ALL INORGANIC PIGMENTS
Resistant to UV and acidic rain exposure.

ANTI-MICROBIAL BY NATURE
Inhibits growth of algae and mildew.

ODOURLESS
No odour within hours and zero VOC.

CUSTOM COLOUR MATCHING AVAILABLE ON REQUEST

Please note 1010 is a solid colour, 1020 is a semi transparent colour
